PROFESSIONAL SUMMARY

Data Science & Analytics Manager specializing in marketing measurement and decision-ready reporting for media and advertising clients. Translates complex data into executive-level narratives that drive investment decisions. Drives AI adoption and agentic AI workflows across analytics functions, and is experienced in leading cross-functional teams, building scalable data infrastructure, and owning analytics end-to-end.

TECHNICAL SKILLS

AI & Automation: Agentic AI, AI agents, AI workflow design, AI-assisted reporting & automation, LLM integration, prompt engineering, Claude, Google Vertex AI, Generative AI, AI adoption & enablement

Analytics & Modeling: SQL, Python, R, descriptive/predictive/prescriptive analytics, feature engineering, time-series analysis, statistical modeling, A/B testing, incrementality

Measurement & Reporting: KPI frameworks, MMM, attribution, campaign analysis, media measurement, executive dashboards, monthly/quarterly/yearly reporting

Visualization & BI: Power BI, Tableau, Looker Studio, Excel

Data Engineering: ETL/data pipelines, BigQuery, GCP, Vertex AI, data cleaning & validation, taxonomy standardization, automation, governance, documentation

Media Platforms: Google Marketing Platform, Google Ads, Meta Ads, Microsoft Ads, Reddit Ads, X Ads

Leadership & Communication: Stakeholder management, client-facing analytics, data storytelling, junior analyst mentorship, cross-functional collaboration

PROFESSIONAL EXPERIENCE

Razorfish | Atlanta, GA

Manager, Data Science & Analytics • Client: Chevron Corporate

April 2026 – Present

- Lead data strategy for Chevron's marketing analytics function, managing 1 analyst and setting standards for QA, reporting consistency, and executive-facing deliverables across monthly and quarterly business cycles.
- Architected cross-source taxonomy and data cleaning workflows, unifying measurement logic across platforms ahead of a data lake implementation—eliminating ad hoc reconciliation across reporting cycles.
- Serve on the agency's internal AI adoption team, leading the rollout of agentic AI and AI-assisted workflows across the analytics department—embedding AI usage into existing reporting processes to improve efficiency, consistency, and speed to insight.
- Designed and deployed AI agents (Claude / Google Vertex AI) loaded with the full history of QBRs and monthly reports, enabling executive stakeholders to instantly analyze and speak to past performance with complete context.
- Built AI-driven automation to generate recurring monthly reporting and streamline analytics workflows, reducing manual reporting effort by 40%.
- Serve as primary analytics liaison between data and media teams, translating KPI definitions, dataset logic, and measurement frameworks into narratives for executive stakeholders.
- Advancing client data maturity by redesigning reporting infrastructure and partnering on database architecture to support long-term measurement needs.

Senior Data Science & Analytics Analyst • Client: Northrop Grumman

July 2024 – March 2026

- Built executive dashboards consolidating 160+ KPIs across platforms into a unified index scoring system, giving leadership a single performance view across media channels.
- Automated reporting pipelines through data normalization and feature engineering, cutting manual processing time by 40%.
- Translated business requirements into scalable SQL and BI solutions, enabling media teams to make data-driven decisions without analyst bottlenecks.

ChoiceLocal | Westlake, OH • Senior Paid Advertising Specialist

August 2022 – July 2024

- Generated \$200K+ in incremental client revenue through Google Ads and Meta optimization, driving a 15% improvement in conversion rates via trend analysis and A/B testing.
- Deployed audience segmentation and predictive modeling across 5+ accounts, increasing CTR 5% and reducing CPA 5%.
- Identified competitive market gaps through analysis that contributed to 10% client market share growth within 6 months.

Honda of America Manufacturing | Union County, OH • Data Analyst Intern (Master's Program)

August 2023 – April 2024

- Built a scikit-learn/pandas model to predict assembly line bottlenecks, improving production efficiency 5% and reducing downtime risk.
- Helped lead a 3-person analytics team on a supply chain analysis project; findings informed lead time reduction and inventory turnover improvements.

SELECTED PROJECTS

- Meridian MMM Portfolio** | End-to-end marketing mix model using synthetic media data; includes ROI pipeline, Google Meridian validation, and stakeholder-ready reporting output.
- Analytics Portfolio** | Python/R projects spanning predictive modeling, clustering, Monte Carlo simulation, regularization, and feature engineering.

EDUCATION

The Ohio State University | Master of Business Analytics (STEM), GPA: 3.6/4.0

August 2023 – July 2024

Kennesaw State University | B.B.A. in Marketing, GPA: 3.8/4.0

August 2018 – July 2022

Certifications: Celonis Analyst | Oracle Database SQL | Google Data Analytics Professional
